Located in Jamestown, New York, UPMC Chautauqua WCA provides advanced health care services to the people of Chautauqua County and the surrounding areas. Since its beginning in 1885, UPMC Chautauqua WCA has been committed to improving the health and well-being of its patients in a way that includes compassion, dedication, and a commitment to quality as well as a focus on patient safety, innovation, and collaboration. This mission and vision has only grown stronger since UPMC Chautauqua WCA became a part of UPMC in 2017.

UPMC CHAUTAUQUA WCA
CARING FOR THE COMMUNITY

STRONGER HEALTH CARE

UPMC is a $16 billion world-renowned health care provider and insurer, whose strength allows it to continue to contribute to the region’s health care needs.

651 Newborns
1,291 Medical Observation Cases
37,693 Emergency Department Visits
4,121 Surgical Cases
261,157 Outpatient Visits
DESIGNATED PRIMARY STROKE CENTER
In June 2017, UPMC Chautauqua WCA became a New York State Designated Primary Stroke Center. This advancement helps to ensure that the patients in our community receive excellent stroke care based on the guidelines of the American Heart Association and the American Stroke Association. Stroke care is extremely time sensitive and, in many cases, the administration of clot-busting medication can make a significant difference in the lives of our patients. In 2017, we treated 392 patients for stroke or stroke-related symptoms and admitted 209 patients to the hospital.

CARDIAC CATHETERIZATION ADVANCEMENTS
Our mission at UPMC Chautauqua WCA is to provide the full spectrum of services for our patients, including care before and after a hospital visit. Our recently installed image-guided system for cardiovascular and interventional imaging assists physicians in a variety of services including: interventional radiology, diagnostic cardiac catheterization, pain management, AICD placement, and generator changes. Many of our physicians, from a variety of specialties, will be utilizing this advanced equipment to meet the needs of our community. Additionally, a new monitoring system will display and analyze blood pressures, heartbeat, breathing, and vital signs during procedures. In 2017, 231 diagnostic cardiac catheterizations were performed and 60 pacemakers were implanted by the cardiac team at UPMC Chautauqua WCA.

EXPANDING WORLD-CLASS CARE
Our exciting building project is a two-story, vertical expansion above our Emergency Department that will add approximately 44,000 square feet to our hospital. The third floor of the building will be home to our new women’s and maternity care center and the fourth floor will be our inpatient adolescent and adult behavioral health units. Each floor was designed with input from our staff and physicians with the patient as our focus. This $20 million project was funded by the Essential Health Care Provider Support Program (EHCPSP). Additionally, in working with our construction management firm, LeChase Construction, we have ensured that many local subcontractors have been used during construction, which has positively impacted the local economy.

WOMEN’S HEALTH ADVANCEMENTS
As part of our ongoing efforts to provide the latest technology and treatments available for patients, UPMC Chautauqua WCA recently installed an advanced breast biopsy system. This integrated technology can increase accuracy and may lead to a decrease in procedure time. In 2017, there were 69 stereotactic biopsies performed.
